

**ANCAP'S CRUDE OIL AND OIL PRODUCTS SOURCING
PORTAL**

Offer to crude oil Tender

In order to access the ANCAP Oil and Products **Sourcing** Portal, you must enter your user name, password, and complete the captcha process.

If the user or password are incorrect, a message will be displayed on the screen.

You have up to 3 attempts. After that, your account will be blocked, and the system will send you an email with a link to unlock it.

If the user is correct but the password is not, you will receive the same message and also a warning e-mail notifying that an attempt was made to enter the site using your credentials.

In case you forgot your password, please click on “Forgot your password?” and then fill the form entering your user e-mail address. You will receive a link by e-mail that will enable you to create a new password.

If this is your first time logging in, the system will ask you to change your password.

The site main page lists all the ongoing tenders and closed tenders in which the members of your company would have offered, including its start date and end date in *UTC - 3* format.

For each ongoing tender, in case you have not made an offer the option Bid will be showed . If you have already made an offer, the options Review and Remove will be showed.

If you click “Remove”, a confirmation dialog will appear, allowing you to confirm or cancel the action.

For each closed tender, you can see the submitted offer by clicking the option “View”.

 ANCAP

To make an offer, you must select “Offer” in the Offer Type option box and a new box will be showed.

By clicking “+ Add New Option” a new form will be displayed to add the detailed information of every crude oil offer you want to make.

You may add as many options as you need by clicking again “+ Add New Option” .

First of all you must select the Seller, if you have one. By default the seller will be the name of your company.

Then you must select the Offer Type: “Simple” for only one crude type or “Coload Combined Offer” for two crude types in one cargo.

A new form will be showed to enter the following parameters:

1- Quality: Crude type, °API (°) , Sulphur (%wt), Acidity (mg KOH/g). For the Pour Point tick the corresponding cell to confirm the crude type offered complies with the required range.

In case of Asphalt purpose crude type, three additional parameters will be showed to be filled with its values or tick the corresponding cell to confirm the crude type offered complies with the required range:

Vacuum Residue Asphaltenes (%wt), Vacuum Residue Viscosity (Poise), Vacuum Residue Max TBP (°C)

2- Quantity (bbls) and Operative Tolerance (%)

3- Price: Differential from Dated Brent (USD/bbl). There are two options for the differential: Premium(+) or Discount(-)

Each parameter will only be accepted if its value is valid for the range defined in the tender description.

The offer option is valid to be saved if all the parameters are valid.

[Save Draft](#) [Update offer](#)

31/10/2025 13

After pressing the “Save Option” button, an option list will be showed. Optionally it is possible to add complement file(s) or to write notes to the offer. **In case of a discrepancy between the information in the options form and the complement files and notes, the information in the option form will overrule the complements in that topic.**

After adding all the options of your offer you can either:

- 1- “Save Draft”.
- 2- “Make Offer”.

Any changes made to the offer will not be saved until you click “Make offer”.

Important: It is highly recommended to execute “Save Draft” or “Make Offer” while adding options in order to assure the information is saved and prevent the risk to lost your offer’s options.
